

1.You have a list:
numbers = [5, 2, 9, 1, 5, 6]
Question:
Sort the list in ascending order and remove duplicates.
Expected Output:
[1, 2, 5, 6, 9]

```
num= [5, 2, 9, 1, 5, 6]
a=[]
for i in num:
    if i not in a:
        a.append(i)
print("after removing the duplicates values",a)
count=len(a)
```
